

SWIMEX

Exceptional Resistance Pools for
Exercise, Swimming, Rehabilitation

ULTIMATE

FITNESS POOL

Enjoy the ultimate fitness pool... right in your own home. If you are buying a swim spa (or fitness pool) for your home, understand these three key pool components:

01

WATERFLOW

The way a current is generated makes a big difference on the pool's functionality and your quality of swim. Understand how the water flow is created. Know its strength, depth, width, and whether its consistent from one session to the next.

02

CONSTRUCTION WARRANTY & MAINTENANCE

Ask how the pool is built, and what kind of warranty comes with the purchase. What are the maintenance costs? How easy is the pool to maintain now and in the future? Will it stand the test of time?

03

CUSTOM OPTIONS

Do you have special features you desire in your pool? Make sure the pool you select can cater to your needs. Can custom stairs be added? Can the pool be deeper in some areas? Can a custom bench built? Can the pool come in a color with tile to match the room décor?

In the pages that follow, you'll learn how SwimEx will meet and exceed all of your expectations... **and why SwimEx is the first choice for people around the world who want the best..**

“

I love to show off our SwimEx pool. It is by far the best purchase I have ever made.

TODD OLSON | GRASONVILLE, MD

It all adds up to a **better workout**

THE SWIMEX STORY

SwimEx has been the leader and innovator in fitness pool swim spas since 1986. Installed all over the world, SwimEx pools are preferred by private homeowners, hospitals, physical therapists, elite athletes, and sports teams.

The non-weight bearing properties of water are the best way to exercise, recover from injury and manage chronic health conditions. Whether you're a swimmer, athlete, or looking for life-changing rehab. SwimEx pools, with solid construction and advanced water current technology, will exceed your expectations.

PADDLEWHEEL INNOVATION FROM MIT

The SwimEx paddlewheel water current was designed and patented by two MIT engineers. This unique system pulls water toward the rear of the pool, then propels the water back to the front of the pool through tunnels to generate a powerful, pool-wide current. The paddlewheel technology delivers a river-like current for the smoothest, deepest and widest water flow on the market today.

ALL ABOUT THE FLOW

SwimEx sets the standard in resistance pools – no other pool comes close. How can we make such a big claim? Our proprietary paddlewheel propulsion system circulates 20,000–25,000 gallons of water per minute. No other pool company comes anywhere near that. Visit our website for a comparison of competitive brands and their technologies: www.SwimEx.com.

Why the SwimEx “**Wall of Water**” Works Better

Imagine swimming against a gentle current that feels just like nature intended. Our swim-in-place pools replicate the sensation of swimming in a river, giving you the freedom to enjoy an invigorating workout or a relaxing swim, all within the confines of your own home. Join the thousands of happy SwimEx clients of those who've transformed their swimming routines into extraordinary experiences. Contact SwimEx today to learn more about how our swim-in-place pools can elevate your lifestyle and redefine your concept of swimming.

Developed by **pioneers in fiberglass** with a vision to see what's possible

EVERETT PEARSON
SwimEx Founder

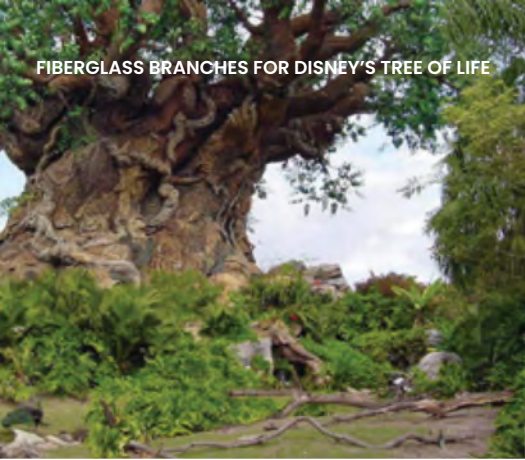

SUZANNE P. VAUGHAN
President

Fiberglass pioneer Everett Pearson was originally recognized for introducing the first fiberglass production sailboats with the company he co founded in 1957 - Pearson Yachts. In 1986, Pearson bought the paddlewheel patents from two MIT engineers. He married his 30 years of design experience and fiberglass expertise with the paddlewheel technology and founded SwimEx.

For over 50 years, Pearson and his staff have been involved with top- of-the-line products, including J-Boat sailboats and the classic Alerion yachts. The Pearson family and staff have worked on a number of other 'next generation' products through their fiberglass-related companies such as bus and electric car prototypes, wind turbine blades and specialty fabrication projects for Disney theme parks.

SwimEx is now a stand alone company owned and operated by Everett's daughter, Suzanne P. Vaughan.

Benefits of using a SwimEx pool

Nonstop disruption

- Improves power, speed & agility
- Improves posture, alignment & stability
- Increases range of motion & flexibility
- Improves balance & coordination
- Reduces muscle pain & spasm
- Increases neurological stimulation
- Eases ambulation
- Reduces joint stress
- Improves muscle strength & endurance

Who Benefits from using SwimEx Pools? Everyone!

- Swimmers
- Joint replacement patients
- Former and current runners
- Retired professional athletes
- Water aerobic exercisers
- Families who want to teach their children to swim
- People with medical conditions
- Anyone looking for low impact exercise, or recovering from an injury, appreciates the advantage that buoyancy gives to exercising without stressing joints and muscles.

Other Key Benefits:

- You set the temperature you prefer (up to 104 F)
- You are in total control of chemicals
- The Edge allows you to program workouts and do interval training so you can measure your improvement
- The small footprint requires only a 12' x 20' area to install (18' x 25' for 1000S)
- SwimEx Pools cost less to heat and maintain than a full size pool or lap lane

I bought my SwimEx pool in 1989. It is a remarkable piece of machinery. It probably saved my life - I was using it regularly, and when I went in for a quadruple bypass they were pleased to find me and my veins in my leg in very good shape. The surgery was very successful. Twenty years later, I am still swimming in it using the original motor, and I have done all the maintenance myself. I keep it filled year-round and run it year-round. I am very happy with the reliability, and the support services have been terrific.

**Howard Elliott | St. Louis,
MO**

“

I purchased a SwimEx after retiring from 11 years of pitching for the Dodgers. By far the best purchase I've ever made. I've had 49 surgeries and 95% of my rehab I've done on my own in my pool. I bought mine 15 years ago and it still runs great!”

DARREN DREIFORT

Built to **last..**
easy to
maintain

A PROUD HERITAGE THAT IS HALF A CENTURY STRONG

With over half a century of experience in bringing state-of-the-art fiberglass products to the market, the Pearson legacy is one of high performance and unparalleled quality. Since its inception, SwimEx has been dedicated to building the finest resistance pools and rehabilitation equipment.

Our goal is to be unsurpassed in:

- The quality of our construction
- The power of our water flow which is responsible for your aquatic experience
- The personal service we provide

SwimEx pools offer a suite of versatile engineering masterpieces with a personal touch. SwimEx is the choice for people who know.

FIBERGLASS CONSTRUCTION = LOW MAINTENANCE + HIGH QUALITY

SwimEx fiberglass pools are built to last and easy to maintain. Made from superior fiberglass composite, SwimEx pools have the same durable construction as fiberglass boats. The proven design formula sandwiches a balsa wood core between layers of fiberglass, resin and gelcoat for an indestructible pool wall (see diagram). That allows our pools to be both free-standing and self-supporting, and adds a layer of insulation, as well. We don't use liners, so there are no liners to replace. Instead, our smooth gelcoat surface:

- Acts as a barrier against moisture absorption
- Cleans easily
- Inhibits algae growth

Why SwimEx?

WHY SWIMMERS CHOOSE SWIMEX

Recreational and competitive swimmers appreciate the smooth counter current water flow. Get a great swim without waiting for lanes or bumping into others at a public pool. Maintain a steady pace without flip turns. Capitalize on your time and concentrate on your strokes.

WHY THERAPISTS CHOOSE SWIMEX Hospitals and physical therapy centers choose SwimEx for its versatility and smooth current. A SwimEx hydrotherapy pool is ideal for working on balance, core strength, and non-weight-bearing activities to rehabilitate from medical conditions such as stress fractures.

SIMPLY THE BEST

Exercising in water is better for muscles and joints. The smooth, yet powerful current has 99 speeds to provide just the right amount of resistance. Swim, walk or run at your own pace, in the privacy of your own home.

Aquatic therapy in a SwimEx Pool is also beneficial in treating a wide range of medical conditions including:

- MS
- Fibromyalgia
- Arthritis
- Osteoarthritis
- Rheumatoid Arthritis
- Frozen shoulder
- Balance disorders
- Neurological & stroke damage

A FULL LINE OF

Engineering masterpieces

SWIMEX POOLS OFFER A SUITE OF VERSATILE ENGINEERING MASTERPIECES WITH A PERSONAL TOUCH

Each pool is made to order to meet your specific exercise needs and complement your home design. Choose from a full line of models with almost limitless options for varying uses.

We look forward to working with you and welcoming you into the SwimEx family.

CHOOSE THE POOL THAT'S RIGHT FOR YOUR HOME:

- Put your pool just about anywhere you please: indoors, outdoors, above ground, partially above ground or fully inground.
- Choose from a large selection of finishes, pool colors and waterline tile options
- Install the flooring under the coping (Ex.A) over the coping (Ex. B) or flush with the coping (Ex. C) for the look you want.
- Add options such as hydrotherapy jets, underwater lights and much more

CHOOSE THE POOL THAT'S RIGHT FOR YOUR SPECIFIC EXERCISE NEEDS:

SwimEx offers seven models with a range of depths and designs to meet your exercise needs. Our experienced account executives will help you select the one that's perfectly suited to you.

THE TWO KEY FACTORS TO CONSIDER ARE:

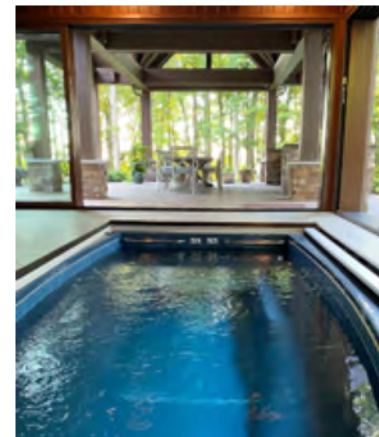

Water depth

Your personal aquatic exercise goals

A >

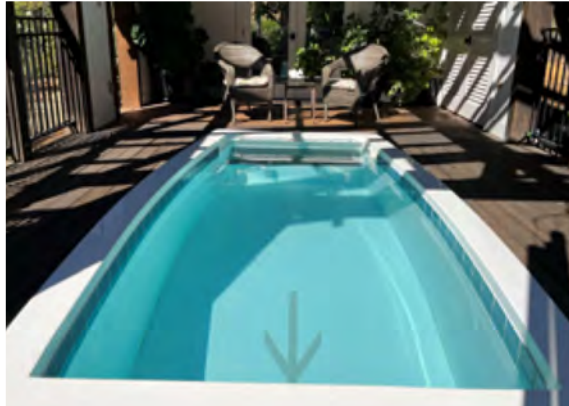

^ B

< C

Flat bottom pools Flat-Bottom pools offer wide open work areas and the flexibility to drop in equipment. Depending on depth chosen, a variety of non-weight bearing activities are possible.

TRITON

- Entry level price point
- Propeller water current
- Open floor area with ability to add shallower depth or deep area
- 50" (1.27m) water depth
- Optional Integrated Treadmill
- One-piece design

400 OS AND 480 S

- Paddlewheel water current
- Flat bottom and deeper for more exercise and therapy versatility
- 400 OS - 42" (1.1m) water depth and 18" deep current flow
- 480 S - 48" (1.2m) water depth and 28" deep current flow
- One piece (400 OS) and four-piece design (480 S)

800 S

- Paddlewheel Water Current
- 66" (1.67m) water depth
- 30" deep water current
- Great for a variety of non-weight bearing activities
- Add a 2nd floor level for additional water depth: 42"-54"
- Add in integrated treadmill, steps, benches or exercise tools
- Four-piece design or can be factory assembled

Performance Zone Pools

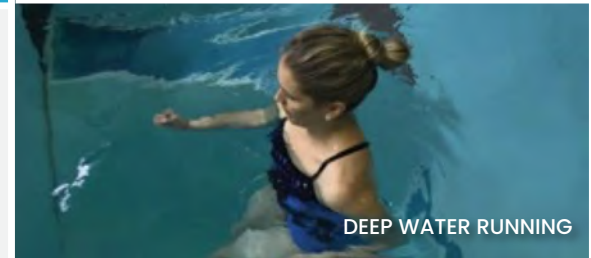

Pools offer side channels for versatile exercise options. Depending on depth chosen, a variety of non-weight bearing activities are possible.

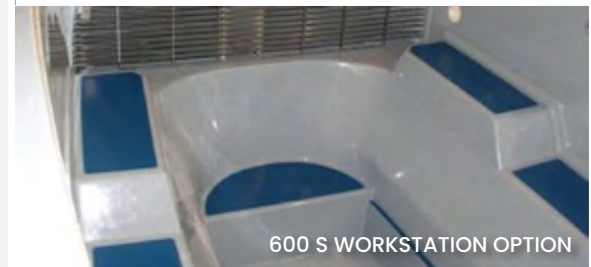

BUILT IN SEATS

RUNNING PLATFORM

DEEP WATER RUNNING

600 S WORKSTATION OPTION

500 OS AND 500 S

- Built-in seats for exercise and relaxation
- Optional jet package for 3 jets behind each seat
- 500 OS - one-piece design
- 500 S - four-piece design
- 50" water depth
- 18" deep water current
- Angled running platform
- 10" front exercise step
- Optional integrated treadmill
- Add a 12" or 24" deep well for added water depth Great for non-weight bearing activities

600 S

- Most powerful SwimEx current flow
- Integrated treadmill
- Add customized workout zones for more exercise and seating options
- Four-piece design or can be factory assembled
- 60" water depth
- 28" deep water current
- Angled running platform
- 10" front exercise step
- Add a 12" or 24" deep well for added water depth. Great for non-weight bearing activities.

Performance Zone Pools

Pools offer side channels for versatile exercise options. Depending on depth chosen, a variety of non-weight bearing activities are possible.

1000 S

- Largest SwimEx Fitness Pool
- Paddlewheel water current
- Water surface area: 10' x 14'
- 30" deep current flow on one side of the pool and still water on the other side for maximum flexibility
- Standard water depths: 48", 60", 72" deep well
- Water depth can be customized to suit your specifications
- Custom design bench, stair and seat configurations
- A pool to entertain, exercise, and swim, all at once
- Easily add length with 2' extensions, up to a maximum of 8'
- Add an integrated treadmill

We had our SwimEx installed around 2005, it had to be craned over the house for installation into its own concrete case due to seismic regulations here in coastal CA. My grandchildren have learned to swim in it and I continue to exercise in it....

Love this 'ol friend of 18 years and counting!

S.H.

Before purchasing my SwimEx, I considered other options, including Endless Pools and Master Spa Michael Phelps. I didn't like the fact that you have to replace the hydraulic motor every five years for the Endless pool. I tried swimming in a Master Spa Michael Phelps model but didn't enjoy the experience. It was very turbulent, I felt like I was in a washing machine.

I tell everyone that my pool is my fountain of youth. I give SwimEx full credit for keeping me in such good health. I keep the water at a nice temperature of 86 degrees, and the warm water eases any sore or stiff muscles.

Working with everyone on the team has been a pleasure. Customer service is outstanding, and they always make me feel like I'm their only customer. I highly recommend SwimEx."

FRANK TODA

We love our SwimEx! My old dancer, gymnast, runner, barrel racing knees can run again without pain on the treadmill! Love it, love it! It has been the key to healing Danny's chronic back pain and a source of great fun for our family from the 28 year old down to the 10 year old.

It is our favorite place to hang out when we are inside at our Pleasant Valley property.

OPTIONS:

Custom sizes - lengths up to 45', widths up to 12', and depths up to 7' / Custom interior configurations / Choice of pool color / Integrated Treadmill

Features & options

Have it your way with our standard features and custom options. We build each pool to your exact specifications so you can experience our exceptional pools and superior customer service.

FEATURES & OPTIONS

Front & Side Handrails for easy handholds.

Ladder Steps for easy access.

Floor Arrow for swimmer positioning

Rear Stop Bar stops the paddlewheel in an emergency.

Air Buttons change water speeds easily while swimming or exercising.

Industrial grade 5 HP Motor or 7.5 HP Motor (depending upon pool model)

Electric Heater, Pump & Filter

Floating Thermal Blanket lightweight and energy efficient pool cover.

Ozonator Water Purification System reduces the need for chemicals.

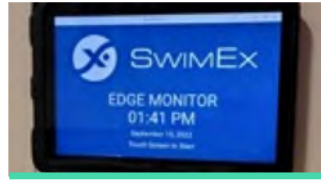

Massage Jets: A triangle of three jets in four locations.

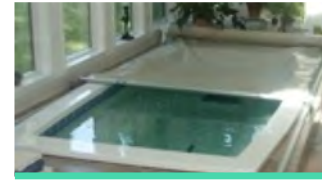

Integrated Motorized Treadmill walk or run on this built-in underwater treadmill.

Hard Top Safety Cover great for outdoor installations for extra insulation/protection.

EDGE Monitor Touchscreen monitor with pre-programmed training routines, swimming workouts, and custom program options

Manual Security Cover a safety cover that you role up manually.

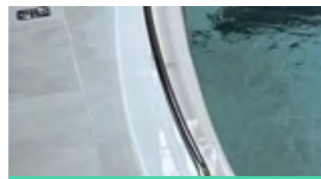

Pool and Coping Colors

End 2 End Safety Cover built to last in all elements and weather conditions, fully-framed to handle snow load

Waterline Tiles add a splash of color & make for an easy waterline cleanup (many choices available)

Stainless Steel Side Handrails

Underwater LED Lights add ambiance for a night swim or entertaining.

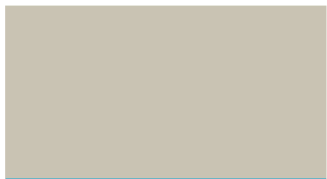

In-Pool Fiberglass Stairs.

Expert Help every step of the way

Getting Started

From your first inquiry through choosing options, design and installation, you get the best service in the industry. We can assist you during the planning and decision-making process, when you are ready to install, and after installation with yearly service and maintenance. Our technical staff can expertly guide you and your contractors with space layouts, CAD drawings, technical information and installation details.

Hassle-Free Installation

SwimEx pools can be installed indoors, outdoors, above ground, in-ground or partially in-ground. What's more, SwimEx pools are free-standing and moveable; additional support is not required. Our one-piece seamless designs means no assembly required, great for new construction and open installations. For easy access into existing space, choose from our four-piece designs assembled on-site.

Most SwimEx pools require 200-240 sq. ft. (18.6-22.3 sq. m.) of space (1000 S requires 450 sq. ft., or 41.8 sq. m.), and a pit or flat-level concrete slab. The standard pit area is 12' x 20' (3.66 m x 6.1 m) (18' x 25' [5.49 m x 7.62 m] for the 1000 S) including a drain or sump pump. On average, the electrical service needed is 105 Amps, 208-240V single-phase. Your pool arrives pre-plumbed, needing only simple PVC connections.

PHASES OF INSTALLATION

"I purchased a SwimEx after retiring from 11 years of pitching for the Dodgers. By far the best purchase I've ever made. I've had 49 surgeries and 95% of my rehab I've done on my own in my pool. I bought mine 15 years ago and it still runs great!"

-DARREN DREIFORT

"My SwimEx pool is one of the best investments we ever made. I love it, use it, it is easy to care for, it is efficient to operate and I would be more than happy to show it...SwimEx is a first class company and respects their customers. The pool is wonderful. I don't think a lot of people realize how cost-friendly the pool actually is to have. And once you figure out where to put it, it is no harder to maintain than weeding your flower beds once a week."

-VICKI

"At first I wasn't sure the pool was right for us. I remember thinking that I didn't need a test swim because I didn't like swimming. Well, that has changed. We enjoy it immensely. My wife uses water workouts to help combat her arthritis. We don't just love our SwimEx - it has changed our family's lives for the better. We are thankful that you and your team stand behind the quality of your product more than any other company we know."

-LEON PETERS

"With our NHL training facility being on the 8th floor, we had some difficult obstacles in upgrading our hydrotherapy room. SwimEx was easy to work with, creative in their solutions, and detailed in their execution. Our project resulted in a cutting-edge hydrotherapy room that will be an integral part of how we care for our athletes. We could not be more pleased with our final SwimEx product and are proud of our new hydrotherapy room."

-JASON SERBUS

DIRECTOR OF SPORTS MEDICINE, WASHINGTON CAPITALS

"We have had tremendous results in treating our athletes in the SwimEx pool. Not only has it helped speed the recovery of America's injured athletes, it also offers tremendous benefits in athletic training. Many of our athletes run and swim against the current, which gives them an incredible workout."

-MR. BOB BEETAN

DIRECTOR OF SPORTS MEDICINE UNITED STATES OLYMPIC COMMITTEE

"I have been enjoying my SwimEx pool since 2008. When I'm in the pool my body feels totally liberated. Many friends have noticed my improved balance and physical endurance since I started using the pool. Joyfully a SwimEx owner and user."

-MARY GARVELINK

"Everyone over 65 should have one of these. You can take away any of my appliances (dishwasher, washing machine, dryer), but don't take my pool!"

-SHIRLEY PETERSON

"I researched different hydrotherapy pools, including Endless and Michael Phelps. We wanted quality, and not something that would need to be replaced in 10 years. After speaking with different pool reps, I found the SwimEx team to be the most helpful, responsive, and detail-oriented. I felt confident choosing SwimEx."

-MONICA

"SwimEx sets the standard in aquatic treatment and rehabilitation, which is why they are the only choice for us."

-PEPPER BURRUSS
